

**Be-Grow Boost L - the perfect choice for vegetable growers to optimize yield and profitability in a sustainable way, year after year.**

Professional vegetable growers know that farming today is more complex than ever before. Unpredictable and increasingly extreme weather conditions, volatile market prices, stricter regulations on pest control - all weigh on the farmer's mind.

What can you expect from Be-Grow Boost L?

- Stronger plants that are more robust against drought and abiotic stress
- Reduced costs through efficient utilization of valuable nutrients and water
- Use of standard agricultural equipment for application
- Boost your yield up to additional +50%

**Benefits have been demonstrated in more than hundred field trials worldwide over eight years together with our partners.**

To realize the full potential professional vegetable growers count on our Be-Grow expert team.
